CORICAMA since 1873.... ITALIAN STYLE and ADVANCED TECHNOLOGY

CORICAMA use only the most suitable steels for the production of surgical instruments to achieve instruments that are both aesthetic and functional.

CORICAMA is a guarantee of high-quality instruments that perfectly fit to the professional sensitivity and contribute to patient well-being. CORICAMA is constantly next to the more demanding dentists and those who seek only the best for their work.

CORICAMA Tooth Forcep #22 #625830

Lower (mandibular) Molars.

Used for dental extraction (also referred to as tooth extraction, exodontia or exodontics) the removal of teeth from the dental alveolus (socket) in the alveolar bone.

Designed for use in specific areas of the mouth. Beaks and Handles are shaped to conform snugly to the contour of the teeth and to easily reach different teeth effectively.

- **Instrument Name:** Tooth Forcep #22 #625830
- **Tip:** Serrated
- **Tip Material:** Stainless Steel
- **Handle:** Anatomic
- **Handle Material:**Stainless Steel

ENDOGRAPH INTRAORAL DENTAL X-RAY

- **The innovation of a breakthrough user interface**

Endograph DC stands out completely from conventional intraoral units and makes a step further in the direction of user friendliness: its beautiful, shield-shaped control unit integrates a full-size LCD display showing the parameters efficiently organized in working areas and, for the first time, cleverly combining icons and tooth name.

Additionally, the user interface can be customized in many languages, thus helping the operator to establish a communication channel with the patients. The levels of brightness and contrast can be adjusted, depending on the environment where the unit is being installed.

- **Wireless X-ray pushbutton**

Endograph DC provides wireless control exposure. The remote timer can be mounted as well out of the way of the beam, to combine settings and exposure out of the patient area.

- **Huge range of configurations**

Endograph DC matches any practice, as it is available with 3 different sizes of extension arms that can be adapted to virtually any room. Upon request, Endograph DC can come also as a mobile unit mounted on trolley, particularly indicated in emergency contexts. Additionally, the standard availability of preset settings for films, Photostimulable Phosphor Plates (PSP), or Digital Detectors, allows the use with any receptor, from any manufacturer.

SCANOGRAPH DIGITAL DENTAL IMAGING

Scanograph has been designed to offer the benefits of PSP plates digital technology and preserve the flexibility and easy use of dental film in intra-oral imaging procedures.

Harness the advantage of instant image availability, no film processing costs and improved work efficiency through a shared multi-room use with Scanograph - the easy and affordable solution for wireless digital imaging.

The thin replaceable PSP or phosphor plate are most suited to veterinary dental imaging as they are flexible and easier to position than the DR equivalent.

Fully automated scan process

Superior ease of use is granted by the fully automatic process: from plate insertion to diagnostic image visualization. When the plate is inserted, the scanner automatically recognizes size number, scans and erases it for new usage, immediately displaying the image on the workstation. The operator is guided first by a multi-color LED indicator showing the status of the system and then by the well-known Villa imaging software.

Plates are available in size 0, 1, 2 and 3, to meet all demands of today's dental professional seeking diagnostic intra-oral solutions. Additionally, the double protection system of the PSP ensures each patient's hygienic safety while extending plate life.

CAMERA TYPE X-RAY SYSTEM

Dental Mobile Handheld X-Ray

It is a small handheld portable X-ray. It has many different features for mobile, battery powered, handheld, cordless, digital, and camera types. It is lightweight, durable, stable, easy to use, and compatible to all radiation detectors, with clear, effective images.

The DX3000 is one of the most popular products in the world and has been leading the technology since 2004.

Features

Convenience & Cost effectiveness

- No need to construct separate shielded rooms, so all operation rooms can be X-ray rooms.
- Lightweight - less than 2kg gives you handy operation and saves time for full mouth X-ray.

Tailored veterinary system and solutions including digital - CR - DR x-ray, other diagnostic equipment supply and service.

- More than 200 shots on single charge (1.5 hour). Battery and a spare battery included.

Compatibility

- Applicable and be compatible with all detectors, film, PSP and all kinds of sensors.

IRay D3 Mobility

- Completely mobile system with a battery and extras.
- Compact design and lightweight allows it to be moved anywhere in and out of the practice.

Safety

- Designed for handheld, so it does not affect the operator with extremely low leakage radiation.
- Rechargeable Lithium polymer battery is very safe and stable with a safety circuit
- Battery can be charged separately with a main X-ray body.
