

## X-RAY EQUIPMENT

### MULTIPURPOSE X-RAY AND SURGERY ROOM – WALL MOUNTED GENERATOR

The multipurpose X-ray and surgery room solution is designed to allow greater use of real estate space, where a practice may or may not have enough space for a separate X-ray room or where would prefer to maximize available floor space in the clinic.

This solution is perfect for integrating your existing or new portable x-ray generator with a mobile longtail DR table able to support up to 136kg weight. It is built with the world's first monolithic full-spine flat-panel DR detector. No more long scan wait, no image stitching, no image gaps, and no plate overlap.

It is the first of its kind to produce long-bone and full-spine digital studies instantaneously with the highest geometric accuracy.

At 44 inch (112 cm) long, the Longtail can take a full spine 42 x 17 inch (108 x 43 cm).

**Lead time:** Subject to stock availability, transit times and radiation licensing. Estimated shipping date to be provided once the purchase is confirmed

## OVERHEAD TUBE CRANE INTEGRATED DIGITAL X-RAY SYSTEM - PREMIUM SOLUTION

The OVERHEAD TUBE CRANE INTEGRATED DIGITAL X-RAY SYSTEM delivers enhanced patient comfort and optimized workflow. Precisely designed to withstand high volume of studies, perfect solution for busy Vets with limited space. The OTC performs exceptionally well in a broad range of radiographic studies. The acquisition time is sub one second in most cases - so it will substantially improve efficiency.

The OTC premium solution is designed to allow greater use of real estate space, where a practice may or may not have enough space for a separate X-ray room or where would prefer to maximize available floor space in the clinic.

## AV CHOICE INTEGRATED DIGITAL X-RAY SYSTEM - PREMIUM SOLUTION

### AV Choice Integrated X-ray System Premium Solution

Your new x-ray facility will benefit from the US built reliability and enhanced functionality of the AV Choice system. AV Choice X-ray systems are equipped with an integrated tube stand with variable SID and an anatomically programmed, high frequency generator providing a cost effective and time saving solution for the veterinarian who seeks maximum capability in minimal space. Our solutions are powered by the intuitive ATX Digital Radiography system giving technologists access to high resolution digital imaging and processing capabilities. The acquisition time is sub one second in most cases - so it will substantially improve efficiency.

You will be able to rely on ATX's on-site and remote assistance to provide ongoing support.
